# LEADING THROUGH INNOVATION

## COVER-PRO, SMI extreme Snow and Ice Protector

### Snow and Ice Membrane Cover

The ultra-white and breathable COVER-PRO membrane was specially developed for high-tech-glacier protection and snowfarming and acts like a Goretex-material.

- The snow water can evaporate from the inside to the outside  
- no ice formation
- The rain cannot enter into the snow from the outside  
- no heat input
- Highest sun reflection and because of an ultra-white surface 12 years guarantee for UV resistance

### Distinctive advantages

- Diffusible – snow water can evaporate to the outside.
- 100 % waterproof – rain cannot enter into the snow.
- The membrane-material does not absorb any water.  
When rolling the material, the snow removes.  
– So the material weight stays always the same
- 100 % windproof– warm winds like foehn is absorbed by 100 %.
- Highest UV resistance (12 years guarantee).
- Durability – 10 to 15 Jahre applicable; under normal circumstances indestructible.
- When storing the roll through the winter, it cannot freeze – it remains smooth and highly moveable, even if there are double-digit sub-zero temperatures.

## SWISS SNOW CONSULT

Professionelles Snowfarming und Gletscherschutz

(ein Unternehmen der SMI Snow Makers AG Gruppe)

Rüttweg 15, CH-3608 Thun/Schweiz

Mobile 079 310 27 36, E-Mail [smi@snowmakers.ch](mailto:smi@snowmakers.ch) / [www.snowfarming.ch](http://www.snowfarming.ch)

- Heat resistance +80°C / resistance to cold -40°C, non-flammable.
- The membrane cannot freeze on snow.  
By simply moving the roll, snow and ice will be easily removed any time.
- Possible roll lengths up to 250 m.  
length 250 m x width 5,2 m = 1300 m<sup>2</sup> = 650 kg roll weight  
(shorter roll lengths are possible)
- The membrane can be sewed by a sewing machine.
- The membrane can be welded.
- The membrane has a dirt-repellent surface.
- Easy-to-clean surface – to a certain extent self-cleaning.
- Mould protection – the membrane has a anti mould system.

## NEW GENERATION

**GLOBAL NOVELTY  
IN GLACIER PROTECTION AND SNOWFARMING  
INDUSTRY**
