

# Leading through innovation

- ➔ **Snowfarming/snow storage**
- ➔ **Glacier protection**
- ➔ **Permafrost protection**
- ➔ **Permafrost rebuilding**

**Planning - execution - project support,  
professional global turnkey solutions,  
including all accessory like:**

**Highly UV-resistant geotextiles/non-woven materials and  
membrane films, connection technology, sewing machines,  
ballast technology, winding machinery, strong-wind protection  
systems, instruction, training, project training, coordination and  
project support on-site**

**A completely affordable and ecological sustainable snow guarantee.  
Also convenient for smaller ski resorts because of a most easy handling.**

**SSC SWISS SNOW CONSULT**  
(an organisation of SMI Snow Makers AG group)

# SNOWFARMING - full service Europe-wide

Since a few years, SSC SWISS SNOW CONSULT develops and researches most efficient technologies and all equipment for an economical interesting snow storage during summer and its reutilisation

Since a few years, SSC SWISS SNOW CONSULT develops and researches most efficient technologies and all equipment for an economical interesting snow storage during summer and its reutilisation

## Ballast technology and wind protection

The gravel bags are of a special geotextile COVERICE highly UV-resistant material. They are easy to mount and fix at the planned positions, also in steep terrain, due to fixation with hook and loop fastener.

In addition to the absolute full service, SSC also offers strong-wind protection systems.

## Connection technology

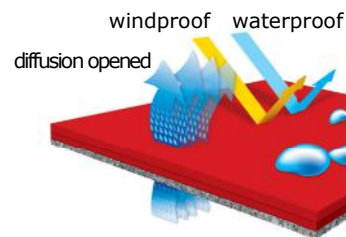

With us, you are well-advised and we will find the best and ideal solution for your special individual project.

New: battery-operated, portable sewing machine for a fast and consistent sewing of geotextile materials on-site

## Your professional and complete snowfarming- and glacier protection service in Europe

offers materials and performances like:

- COVER-PRO 500
- COVERICE AIR-MAX
- exact planning
- support and instruction on-site
- 3D-Vision aerial scanning for the determination of snow volume and snow loss

**Global novelty**  
**COVER-PRO 500**  
**Goretex-membrane**

### COVERICE AIR-MAX

With air-placeholder between upper and lower layers of geotextile material, as thermal isolation
